

DOTCONNECTAFRICA'S FEEDBACK TO THE ICANN INTERNET GOVERNANCE & ICANN ECOSYSTEM MAPS

DotConnectAfrica provided feedback and inputs on Internet Governance & ICANN Ecosystem Maps they are currently developing. The draft map is linked [Here](#).

The Following were the recommendations:

1) What do you like about the map? (500 characters 500)

Response : *The map is simple and well executed with the various relationships that exist between the various multistakeholders.*

2) What would you change? (500 characters max500)

Response : *I would change the colors specially at the Process Path and the blue ring that indicates the process so that there is distinction and clarity as to the process and what goes on with the process, this is the critical part where many people are involved, perhaps change the ring to a deeper color.*

The arrows as well indicating the policies, standards and open debate can be illustrated in different colors each all for the clarity.

The map under review is below:
